

Alarm Response Options Authorization Form

Residential & Commercial Monitored Alarm Customers

Our standard monitoring procedure is as follows:

Upon receipt of a single alarm, our standard two-call verification will be followed. If we are unable to reach someone within the first two calls we will dispatch police unless directed to do otherwise and continue to call the remainder of those individuals on the call list. (Private Security will be dispatched for those accounts that have elected this option.) If your account is already set up for private security dispatch, that service will continue.

If you would like to change to Private Security dispatch, check the first box below. To opt out of Private Security dispatch, check the second box below.

I choose the Private Guard Response option for my Burglar Alarm Signals. I understand the charges (currently \$50 per incident) for this response will be billed to my account in the event of a Private Guard Response dispatch.

I understand the options and would prefer to not request Private Guard Response. I understand that I am responsible for False Alarm fines from the Police Department if they respond and cannot determine it was a legitimate alarm trip. Current fines range from \$85 to \$240.
